# Il Ceppo

## FIRENZE

Nel 1964 a Firenze sulle rive dell'Arno inizia la sua storia "Il Ceppo", marchio simbolo di prodotti artigianali pregiati e unici per la rasatura.

"Il Ceppo" coglie i segnali di un mondo in continua trasformazione, dove l'uomo tende a riscoprire la pratica e i piaceri dimenticati come la rasatura, rinnovando un rito senza tempo.

La rasatura diventa così sempre più nel tempo un rito quotidiano di benessere che suscita ricordi ed emozioni.

Così nel corso degli anni, rivolgendosi ad un pubblico di raffinati intenditori, grazie al design innovativo ed elegante e ai dettagli sofisticati, "Il Ceppo" è diventato un "artista" del mondo della rasatura creando prodotti dall'inconfondibile stile ed eleganza italiani. Eccellenza e gusto, creatività e qualità, eleganza e raffinatezza, tradizione e contemporaneità, contraddistinguono tutti i nostri prodotti.

La continua ricerca di nuove forme, materiali e nuove finiture ha fatto sì che ad oggi, il nostro catalogo sia unico nel suo genere, con una vasta gamma di articoli pronti a soddisfare tutte le esigenze.

Tutto questo senza perdere di vista la cura dei particolari che hanno reso "Il Ceppo" uno dei brand per la rasatura più conosciuti e apprezzati nel mondo.

Farsi la barba e radersi con i prodotti "Il Ceppo" non è semplicemente un banale gesto quotidiano, è un'esperienza che racchiude una storia italiana.

*The story of "Il Ceppo" begins in 1964 in Florence, off the banks of the Arno river, and since then has represented high quality and uniqueness in the world of hand-crafted shaving sets.*

*"Il Ceppo" is constantly trying to catch the signs of a world continuously challenged by changes, where gentlemen are looking for simple but forgotten pleasures like "shaving the old way", hence showing renewed interest in a timeless practice.*

*Shaving is again and continues overtime to be a daily magic experience full of memories and warm feelings.*

*Over the years "Il Ceppo" has developed a sort of complicity with an ever growing number of sophisticated customers, more and more appreciating the artist able to constantly offer, to the shaving world, the elegance of the Italian style, through unequalled design and appearance.*

*All our products are the outcome of creativity, quality assurance and distinction in the frame of the tradition and innovation.*

*The continuous search for new shapes, materials and new finishes has made it that to date, our catalog is one of a kind, with a vast range of articles ready to satisfy all needs.*

*All this without losing sight of the attention to detail that they have made*

*"Il Ceppo" one of the best known and most appreciated shaving brands in the world world.*

*Il Ceppo, therefore, is not your shaving exercise - it's an experience made of authentic Italian history.*

# TESTINE RASOI • RAZOR HEAD

**Fusion:** è il nuovo rasoio della Gillette con 5 lame e la lama di precisione sul retro per definire il look nei punti più difficili o per le basette; ha una striscia lubrificante arricchita con olii minerali, Aloe e vitamina E ed una striscia nella parte bassa che aiuta a distendere la pelle.

**Fusion:** the newest Gillette razor with 5 blades and extra precision trimmer, useful when shaving in tricky places like under the nose or cutting sideburns. It also features a lubricant strip containing aloe, vitamin E and touch of mineral oil, along with a lower strip which helps relaxing skin.

## • Fusion •

## • Mach 3 •

**Mach3:** è una delle testine Gillette a tre lame più usata, con lama basculante per agevolare la rasatura.

**Mach3:** one of the most popular Gillette 3 blade razors, with swinging head to easy shaving.

**Testina Safety:** ha le lame da entrambi i lati ed è una testina ad alta precisione. E' importante tenere il rasoio inclinato nel modo giusto. (circa a 30°) per avere un'ottima rasatura.

**Safety or double edge razor:** with cutting edges on both sides. It's a high precision razor and needs to be handled at an appropriate angle (about 30' tilt) for best results.

## • Safety •

# CIUFFI • TUFTS

## • QUALITA' DEI CIUFFI UTILIZZATI •

**Setola di maiale:** è un pelo molto duro ma ha una maggiore capacità di stendere il sapone sul volto, però ha un'ulteriore problema, le setole si spezzano facilmente.

## • QUALITY OF HAIR USED •

**Pig Bristles:** this is very harsh hair but it works good for lathering, although it easily splits.

# CIUFFI • TUFTS

I peli in tasso si differenziano dalla zona del corpo dell'animale dove vengono presi e sono i seguenti:

•**Setola di maiale:** è un pelo molto duro ma ha una maggiore capacità di stendere il sapone sul volto, però ha un'ulteriore problema, le setole si spezzano facilmente.

I peli in tasso si differenziano dalla zona del corpo dell'animale dove vengono presi e sono i seguenti:

•**Tasso grigio:** viene prodotto con peli presi dal ventre del tasso, questa tipologia di pelo è grossolano e risulta un pò "rigido" a contatto con la pelle del viso. Il colore è scuro ma vengono inseriti alcuni peli di colore marrone chiaro, riflessi color argento.

•**Tasso seconda qualità:** viene preso anche dalla pancia del tasso e sono peli più fini e malleabili, possiedono una lunghezza maggiore dei precedenti e sono più chiari, a contatto con la pelle risultano molto morbidi.

•**Tasso prima qualità:** viene prodotto con peli di tasso selezionati attentamente. Una prova per vedere se un pennello è in tasso SUPER, consiste nell'esaminare le punte dei peli che non devono essere bianche ma piuttosto sul grigio, questo color bianco "spento" non deve estendersi su tutto il pelo ma deve essere isolato in punta.

•**Tasso argento:** è tra i più pregiati, il pelo selezionato scrupolosamente e la forma "svasata" che viene data alle setole, una volta fissate al manico, fa sì che il pennello riesca a tenere una grande quantità d'acqua e quindi fa sì che il sapone "si monti" più facilmente.

•**Tasso sintetico:** sono setole di nylon molto soffici e creano velocemente una soffice schiuma sul sapone da barba.

*Badger hair varies depending on which portion of the animal's body it comes from:*

•**Pig Bristles:** *this is very harsh hair but it works good for lathering, although it easily splits. Badger hair varies depending on which portion of the animal's body it comes from:*

•**Pure badger:** *made from hair coming from animal's belly. It's coarse and a bit rough on skin. Its color is generally dark, with some added inserts of brown hair blending to silver tones.*

•**Best badger:** *also comes from animal's belly but this hair is thinner and more flexible, with longer length and lighter coloration. Nice and soft skin contact.*

•**Super badger:** *accurately selected hair. If you look at the single tips, they appear greyish rather than white - but only the tip has that tone of color and not the rest of the hair.*

•**Silvertip:** *one of the best. Carefully selected hair along with given flared shape, once it is assembled on its handle, helps brush in absorbing a lot of water to easily produce lather.*

•**Silvertip fibre:** *very soft nylon hair which quickly fluffs up a smooth lather of shaving soap.*
